Professional Summary

I am Rashin Latify, the supporter and question designer of Darsman Academy

• I am an expert in Python and Django.

• In the field of front end, I completed JavaScript and jQuery courses and I am currently completing React courses.

• As a project of the end of the semester of the Python master's course, I development the website Momtaz Academy completely (web design, front and backend of the web).

• I am very interested in programming and problem solving.

Work Experiences

Student support and question designer | Oct 2022 - Present

Darsman Academy | https://www.darsman.com

After the end of the first semester, I was asked to work as a supporter in my academic group.

• In the group of students, I answer and guide their questions if they remain unanswered.

• I design practice questions and projects in this area.

I also presented Momtaz Academy web site as a practice project

Website development | Feb 2022 - Mar 2023

Momtaz Academy | https://www.momtaz-academy.ir

language training school

I designed all the website pages myself.

I completed the front part with js and jquery, sass and bootstrap and made it fully responsive.

I completed backend part of this website using Python and the Django framework

which has the following features:

- Adding its course and terms along with saving and displaying related books
- Add the teacher and give him appropriate permissions and save and display the teacher's introduction video
- Registration of students through the website and control panel
- Password change and authentication by sending SMS for students and teachers
- Student user panel with personal, educational and financial information and the ability to edit personal information
- The ability of the teacher to enter the control panel and view only his students to edit their grades
- Adding videos with different titles and displaying them on the gallery part of website
- Commenting and replying to comments in the detail section of each teacher

➢ Note that one of the reasons that made the process of completing the website longer was that I built this website during the training course and as a final project of the semester.

Education Experiences

Bachelor of geology | Sep 2009 - May 2012

Shahid Chamran University of Ahvaz | Sep 2009 - May 2012

Skills

- **Python / Django Framework(Advanced)**
